Conservation of waterbirds and wetlands is widely considered to be crucial for sustainable development and society. To achieve conservation of wetlands, local conservation organizations and government agencies must translate scientific knowledge into local knowledge so that it is understandable to non-scientific communities. The waterbirds and wetlands conservation is also looking at the effectiveness and efficiencies of wetlands management and conservation. However, it is also important to share the highlight the standards in making conservation in different place working the same conservation activities. There are programmes from other partners may help specific management concerns and also provide clear state of biodiversity and contribute to national of local policies.

To address these issues the Philippines Biodiversity Conservation Foundation, Inc. (PBCFI) in partnership with Department of Environment and Natural Resources Negros Island Region (DENR NIR), Negros Occidental Provincial Management Office (PEMO), Carlos Hilado Memorial State College (CHMSC), Negros Occidental Coastal Areas Management Council (NOCWAMA), different local government unit (LGU) of Negros and other network of partners will come together for forum in title *"Negros Waterbirds and Wetlands Conservation Their Future is Our Future"* and share different knowledge and experience in working in on wetlands conservation. Thus this symposium aims to gather together the different local government units, wetlands conservationist and partners from the island.

This forum aims to share knowledge best practices in wetlands conservation, awareness and strengthened partnerships between different waterbirds and

wetlands conservation government organization and non-organizations in the wise use of wetlands within the Negros Occidental Coastal Wetlands Conservation Areas and other key important wetlands in Negros Island Region. These symposiums will also harmonized programs geared towards global wetlands conservation targets. Specifically the objectives are the following:

1. To bring together experts from the field, practitioners and mandated institutions working on waterbirds and wetlands conservation best practices
2. To document different initiatives in wetlands conservation and identify gaps and opportunities for future collaborations
3. To create a network of technical experts in waterbirds and wetlands conservation support within different partnerships.
