

World Migratory Bird Day

World Migratory Bird Day 2018 Cambodia

WORLD MIGRATORY BIRD DAY 2018 IN CAMBODIA

Cambodia has become a partner of East Asian-Australasian Flyway Partnership (EAAFP) since 2007. EAAFP is a partnership network of countries in the East Asian-Australasian Flyway that conserve migratory birds, their habitat and people livelihood of that area. Since 2006, World Migratory Bird Day (WMBD) has been celebrated as an annual awareness-raising campaign for awareness raising and promote migratory birds and conservation activities to public. Cambodia, as partner countries, has celebrated World Migratory Bird Day since 2015. This year is the fourth time in a row that Cambodia celebrated this annual awareness-raising event under the theme of “Unifying Our Voices for Bird Conservation

WMBD was celebrated on 9th and 10th May 2018 by Department of Freshwater Wetland Conservation of General Directorate of Administration for Nature Conservation and Protection, Ministry of Environment together with Environmental Department of Kampot province, and our partners who are working on natural resources and wetlands conservation and management organized awareness and education event “World Migratory Bird Day 2018” at Anlung Pring Protected Landscape where a flock of Sarus Crane and other shorebird such as Black-tailed Godwit using that area as feeding ground during their non-breeding period.

This awareness event, World Migratory Bird Day 2018, organized for the purpose of increasing the awareness of natural resource management and conservation of migratory birds, to encourage the public, especially students, to love and protect migratory birds, and to encourage the public to participate in protecting the breeding and non-breeding grounds of migratory birds.

Many awareness raising materials were designed and produced including books and banners (figure 2, 3, and 4). In addition, T-shirts also been designed and printed for students and related NGOs showing the message of World Migratory Bird Day 2018 in the theme of “Unifying our Voices for Bird Conservation” (figure 1). Leaflets about the impact of agriculture chemical fertilizer and pesticide on people, wildlife, and wetland were produced (figure 5) to be distributed to villagers for awareness of their fertilizer and pesticide usage. The education audio was recorded as awareness raising tools to play during the awareness parade.

On 9th May 2018, participants and university students traveled to Anlung Pring Protected Landscape to learn about site conservation, ecotourism and bird identification. Site manager, partner NGOs and head of community based ecotourism briefly introduced site management, ecotourism operation and Sarus Crane conservation at the site. With guiding from conservationist, university students walk to the wetland station and learnt about wetland

ecology and using of telescope and binocular for birding. In addition, students also participants to finding birds challenge which were conducted in the wetland station where students able to spot birds through telescope and record the name of each specie their found into the bird log. The winner who able to spot most of the species was provided a reward after finished the challenge.

On 10th May 2018, WMBD event took place at Thmor Berk Secondary School located nearby Anlung Pring Protected Landscaped with participation of about 450 people including students, local authorities, villagers, conservation NGOs, university students. It presided over by H.E Chea Sam Ang, Director General of General Directorate of Administration for Nature Conservation and Protection, Ministry of Environment and there were 4 speakers coming from different institutions but work together to conserve wetlands and migratory birds. The 4 speaker are:

1. Mr. Suy Thea, Director of Environmental Department of Kampot province
2. Mr. Bou Vorsak, Program Manager, BirdLife International, Cambodia Programme
3. Mr. Nay Kong, Deputy Governor, Kampot province
4. H.E Chea Sam Ang, Director General, General Directorate of Administration for Nature Conservation and Protection, Ministry of Environment

The key message delivered by the 4 speakers for the event focused on “Together to Conserve Migratory Birds”. The activities followed by the event included Question and Answer section to students, bird drawing competition, poem recitation, bird watching, and distribution of awareness materials. The event also involved awareness parade in and around the villages to distribute leaflets about impact of using agriculture chemical fertilizer and pesticide to human, wildlife and wetlands. Participants get on tractors and some of them ride bicycles with the bird sign such as Sarus Crane and other water bird species with the education audio being played. The parade started from Thmor Berk Secondary School and paraded along the road to the villages. This parade was not only raising awareness to villager about the impact of pesticide through education audio and leaflets but also drawn their attention toward Sarus Crane and wetland conservation at Anlung Pring Protected Landscape.

The public event also captured and spread through Ministry of Environment and partner NGOs social media. The messages and the objective of this annual awareness event, World Migratory Bird Day, will reach more public people attention toward conservation of migratory bird and its habitat.

World Migratory Bird Day 2018 is regarded as successful event. It had provided the opportunity for university student and local students to visit the important wetland site-Anlung Pring Protected Landscape and understand about conservation of Sarus Crane, migratory birds and the flyway. Moreover, the awareness raising campaign in the villages about the impact of agriculture chemical fertilizer and pesticide on people, wildlife and wetland significant drawn the attention by local villagers and students.

Table 1: birds list found by university students:

No.	Birds Name
1	Garganey
2	Black-winged stilt
3	Black-tail Godwit
4	Little Cormorant
5	Common Myna
6	Little Egret
7	Intermediate Egret
8	Grey Heron
9	Purple Heron
10	Common Sandpiper
